

China's corporate sector: Deleveraging or re-leveraging?

Betty Huang / Le Xia (Asia Unit)

December 11, 2018

China's deleveraging campaign bore some early fruits...

Starting from the second half of 2016, the Chinese authorities set out to tackle the indebtedness issue of its corporate sector and inaugurate a campaign of “deleveraging” as the debt of China's corporate sector rose to an unprecedentedly high level (166.4% of GDP as of end-2016) which exposed a material threat to the country's debt sustainability and financial stability. (Figure 1)

In the following two years China's authorities deployed a number of policy initiatives to curb further rise of corporate debt level, including: (i) implementing neutral monetary policy with some tightening biases; (ii) cleaning up a large number of zombie companies to address the “soft budget” problem; (iii) disciplining state owned enterprises (SOEs) and local government financing vehicles (LGFVs) from over-borrowing; (iv) preventing banks from lending money to certain industries with serious overcapacity; and (v) clamping down China's gigantic shadow banking sector. (Please see our previous report of [Early fruits of corporate deleveraging add to growth resilience](#))

The authorities' efforts to deleverage China's corporate sector bore some early fruits. As of end-2017, China's corporate debt increased by 160.3% of GDP, the slowest pace since 2011. As reported by the National Statistics Bureau (Figure 2), the leverage ratio of Chinese non-financial firms, which is defined as the ratio of their total liabilities to total assets, declined further in 2017. However, such a decline appeared to be uneven as private firms' leverage ratio even rose in 2017 in contrast to the trend of that among SOEs.

Figure 1 China's total debt level stabilized in 2017

...however, deleveraging efforts weighed on private enterprises

The deleveraging measures implemented by China's authorities also have the side effect. The monetary tightening and clamp-down of shadow banking activities cut firms, in particular private and small ones, off credit supply which they used to live on; the strengthened control of SOEs and LGFV debt dampened economic activities and investment; the clean-up of zombie companies and overcapacity in certain industries led to more unemployment in the society. Worse is the unexpected escalation of US-China trade tensions in early 2018, which severely dampened the confidence of both investors and consumers.

Creating Opportunities

As a consequence, the private enterprises (POEs) in China bore the brunt of the deleveraging measures and escalating trade tensions with the US, due in part to the lack of the governmental support which are only applied to their SOE peers. The balance sheets of POEs deteriorated rapidly in 2018 (Figure 3 and 4)

Figure 3 The rise of liquidation cases concentrated on POEs...

Figure 6 China's de-leveraging effort has mainly squeezed smaller lenders

Source: Wind and BBVA Research

POEs' disadvantages relative to SOEs through the deleverage campaign could also be found with listed firms. Based on the information contained in their financial statements, we have constructed two indicators to measure their indebtedness. (Figure 5) One is the ratio of Debt-to-EBITDA, which is a proxy of a firm's debt level relative to its cash flow. The other is the ratio of EBITDA-to-Interest Expense, which gauges a firm's capacity to service its interest-bearing debt. A natural threshold of this ratio is 1. A firm with its ratio of EBITDA-to-Interest Expense below this benchmark could have difficulty in servicing its debt.

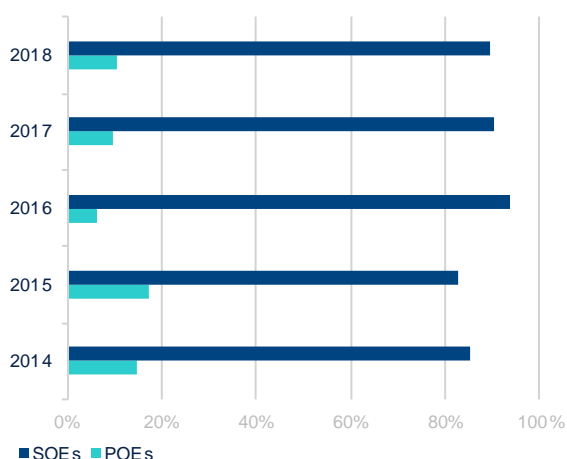

The median of Debt-to-EBITDA ratio among all listed non-SOEs rose in 2017 and the first half of 2018, suggesting that the non-SOEs failed to improve their balance sheets during the deleveraging campaign. The capacity of debt

servicing for listed non-SOEs also deteriorated in the first half of 2018 as the share of listed non-SOEs with an EBITDA-to-Interest Expense ratio below 1 increased from its level of 2017.

One prime reason why POEs failed to reduce their leverage is the clampdown of shadow banking activities which have cut them off funding channels and exposed them to great refinancing risk. At the same time, the formal banking sector was reluctant to increase their support for private enterprises due to both ever-increasing regulatory pressure and worsening economic outlook. As such, China's deleveraging efforts have mainly squeezed smaller borrowers rather than well capitalized SOEs. Yearly growth of bank lending to small-medium-sized enterprises (SMEs), the majority of which are POEs, moderated to 12.2% in June 2018 from 17.2% a year ago. (Figure 6) Accordingly, the share of new bank lending to SMEs declined to 20.9% of total new corporate loans, a five-year low.

Moreover, huge risks are exposed in a new form of bank business called stock-pledged lending (SPL). In order to obtain funding from banks, some major shareholders of listed POEs used their holding shares as collaterals. SPL businesses grew very fast in the past several years as its total size increased from RMB 337 billion in 2014 to RMB 1.6 trillion in 2017 (Figure 7 & 8). Recently sluggish stock market has made the value of collaterals drop below the value of related loans and therefore triggered marginal calls for the borrowers. As such, these listed POEs are under greater financial pressures now.

The authorities have shifted their policy stance to pro-growth...

In face of intensifying growth headwinds and POE woes, the authorities changed their policy tones from “deleveraging” to “stabilizing firms’ leverage”. In particular, the central bank cut the bank reserve requirement ratio by 1% effective Oct. 15 and expanding the range of pledged assets for commercial banks to apply for Mid-term Lending Facilities (MLF). The move will inject a net 750 billion yuan (USD 10.9.2billion) in cash into the banking system by releasing a total of 1.2 trillion yuan in liquidity. (Figure 9) The authorities also implemented a series of policy initiatives to support Small and Medium Enterprises(SMEs),including highlighting the big banks’ efforts to boost lending to cash-starved small firms, offering collateral waivers and setting loan targets to SMEs. To guide lending to small firms, authorities have issued directives to banks, arranged meetings between executives of banks and private firms, and doled out tax breaks for banks’ “micro-loans”,etc.

On the fiscal front, the authorities have implemented a series of tax cuts in various perspectives to reduce the costs and stimulate growth since this year. The authorities have cut the payroll tax for individuals and enterprises, including the adjustment of personal income tax, VAT and import tax etc. These measures will cut the enterprises’

cost and thus help with the deleveraging process. The VAT cuts are expected to save 240 billion yuan (USD 38 billion) in taxes this year, thus will boost the real economy through reducing corporate burdens and create a stable and fair business environment.

...which could lead to the rise of leverage again

According to the past experience, policy stimulus was always followed by the rise of the country's debt level (Figure 10). If not handled carefully, the corporate debt issue will become acute again in the next few years. That being said, China authorities should strike a balance between sustaining a decent growth rate and limiting the pace of debt increase. We believe that the following suggestions could help the authorities to achieve the balanced objectives.

Figure 9 Policy injected cash to the banking system

Source: Wind and BBVA Research

Figure 10 Policy stimulus always led to debt rise

Source: NBS and BBVA Research

First, the authorities should commit to the clampdown of shadow banking activities and encourage formal banking sector to extend more credit to SMEs. Shadow banking activities have been the prime culprit for China's credit binge in the past. If the authorities want to keep debt growth at a sustainable pace, they should not relax their existing regulations for shadow banking activities.

Second, the authorities should make fiscal policy spearhead the stimulus package this time. In particular, the authorities could be more aggressive in cutting taxes for the corporate sector and providing support for SMEs rather than resorting to monetary loosening. The key difference is that additional fiscal initiatives are likely to improve corporate balance sheets and increase the debt level of China's central government which still looks healthy (47% of GDP in 2017).

Last but not least, the authorities should seek to solve the trade tensions with the US as soon as possible. Export is the type of economic activities which generates growth with less credit consumption. If the authorities want to see a credit-less growth, they must find the ways to reactivate the powerful exporting machine.

All in all, stimulating growth and controlling debt at the same time is a very challenging task for China's authorities. They still have the chance to make this time different if appropriate policy initiatives are to be implemented.

IMPORTANT DISCLOSURES

The BBVA Group companies that have participated in preparing or contributed information, opinions, estimates, forecasts or recommendations to this report are identified by the location(s) of the author(s) listed on the first page as follows: 1) Madrid, London or Europe = Banco Bilbao Vizcaya Argentaria, S.A., including its E.U. branches (hereinafter called 'BBVA'); 2) Mexico City = BBVA Bancomer, S.A. Institución de Banca Múltiple, Grupo Financiero BBVA Bancomer (hereinafter called 'BBVA Bancomer'); 3) New York = BBVA Securities, Inc. (hereinafter called "BBVA Securities"); 4.) New York Branch = BBVA, New York branch; 5.) Lima = BBVA Continental; 6.) Bogota = BBVA Colombia S.A.; 7.) Santiago = BBVA Chile S.A.; 8.) Hong Kong = BBVA, Hong Kong branch, 9.) Istanbul = Garanti Securities.

For recipients in the European Union, this document is distributed by BBVA, a bank supervised by the Bank of Spain and by Spain's Stock Exchange Commission (CNMV), and registered with the Bank of Spain with number 0182.

For recipients in Hong Kong, this document is distributed by BBVA, which Hong Kong branch is supervised by the Hong Kong Monetary Authority.

For recipients in Mexico, this document is distributed by BBVA Bancomer, a bank supervised by the Comisión Nacional Bancaria y de Valores de México.

For recipients in Peru, this document is distributed by BBVA Continental, a bank supervised by the Superintendencia de Banca, Seguros y Administradoras Privadas de Fondos de Pensiones.

For recipients in Singapore, this document is distributed by BBVA, which Singapore branch is supervised by the Monetary Authority of Singapore.

For recipients in USA, research on products other than swaps, or equity securities and equity derivatives prepared by BBVA, is being distributed by BBVA Securities, a subsidiary of BBVA registered with and supervised by the U.S. Securities and Exchange Commission and a member of the Financial Industry Regulatory Authority ("FINRA") and the Securities Investor Protection Corporation. U.S. persons wishing to execute any transactions should do so only by contacting a representative of BBVA Securities in the U.S. Unless local regulations provide otherwise, non-U.S. persons should contact and execute transactions through a BBVA branch or affiliate in their home jurisdiction.

Research on swaps is being distributed by BBVA, a swaps dealer registered with and supervised by the Commodity Futures Trading Commission ("CFTC"). U.S. persons wishing to execute any transactions should do so only by contacting a representative of BBVA. Unless local regulations provide otherwise, non-U.S. persons should contact and execute transactions through a BBVA branch or affiliate in their home jurisdiction.

Research prepared by BBVA on equity securities and equity derivatives is being distributed by BBVA to "major U.S. institutional investors" based on an exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act"). BBVA is not a registered broker-dealer in the United States and is not subject to U.S. rules on preparing research or independence of research analysts.

BBVA and BBVA Group companies or affiliates (art. 42 of the Royal Decree of 22 August 1885 Code of Commerce), are subject to the BBVA Group Policy on Conduct for Security Market Operations which establishes common standards for activity in these entities' markets, but also specifically for analysis and analysts. This BBVA policy is available for reference at the following web site: www.bbva.com.

Analysts residing outside the U.S. who have contributed to this report may not be registered with or qualified as research analysts by FINRA or the New York Stock Exchange and may not be considered "associated persons" of BBVA Securities (as such term is construed by the rules of FINRA). As such, they may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with subject companies, public appearances and trading of securities held in research analysts' accounts.

BBVA is subject to an Internal Standards of Conduct on the Security Markets, which details the standards of the above-mentioned overall policy for the EU. Among other regulations, it includes rules to prevent and avoid conflicts of interests with the ratings given, including information barriers. This Internal Standards of Conduct on the Security Markets is available for reference in the 'Corporate Governance' section of the following web site: www.bbva.com

BBVA Bancomer is subject to a Code of Conduct and to Internal Standards of Conduct for Security Market Operations, which details the standards of the above-mentioned overall policy for Mexico. Among other regulations, it includes rules to prevent and avoid conflicts of interests with the ratings given, including information barriers. This Code and the Internal Standards are available for reference in the 'Grupo BBVA Bancomer' subsection of the 'Conócenos' menu of the following web site: www.bancomer.com

BBVA Continental is subject to a Code of Conduct and to a Code of Ethics for Security Market Operations, which details the standards of the above-mentioned overall policy for Peru. Among other regulations, it includes rules to prevent and avoid conflicts of interests with the ratings given, including information barriers. Both Codes are available for reference in the 'Nuestro Banco' menu of the following web site: <https://www.bbvacontinental.pe/meta/conoce-bbva/>

BBVA Securities is subject to a Capital Markets Code of Conduct, which details the standards of the above-mentioned overall policy for USA. Among other regulations, it includes rules to prevent and avoid conflicts of interests with the ratings given, including information barriers.

Exclusively for Recipients Resident in Mexico

BBVA Bancomer acts as a market maker/specialist in: MexDer Future Contracts (US dollar [DEUA], 28-day TIEs [TE28], TIE Swaps, 91-day CETES [CE91]), Bonos M, Bonos M3, Bonos M10, BMV Price and Quotations Index (IPC), Options Contracts (IPC, shares in América Móvil, Cemex, CPO, Femsa UBD, Gcarso A1, Telmex L) and Udibonos.

BBVA Bancomer, and, as applicable, its affiliates within BBVA Bancomer Financial Group, may hold from time to time investments in the securities or derivative financial instruments with underlying securities covered in this report, which represent 10% or more of its securities or investment portfolio, or 10% or more of the issue or underlying of the securities covered.

DISCLAIMER

This document and the information, opinions, estimates, forecasts and recommendations expressed herein have been prepared to provide BBVA Group's customers with general information and are current as of the date hereof and subject to changes without prior notice. Neither BBVA nor any of its affiliates is responsible for giving notice of such changes or for updating the contents hereof.

This document and its contents do not constitute an offer, invitation or solicitation to purchase or subscribe to any securities or other instruments, to undertake or divest investments, or to participate in any trading strategy. Neither shall this document nor its contents form the basis of any contract, commitment or decision of any kind.

Investors who have access to this document should be aware that the securities, instruments or investments to which it refers may not be appropriate for them due to their specific investment goals, financial positions or risk profiles, as these have not been taken into account to prepare this report. Therefore, investors should make their own investment decisions considering the said circumstances and obtaining such specialized advice as may be necessary. Other than the disclosures relating to BBVA Group, the contents of this document are based upon information available to the public that has been obtained from sources considered to be reliable. However, such information has not been independently verified by BBVA or any of its affiliates and therefore no warranty, either express or implicit, is given regarding its accuracy, integrity or correctness. To the extent permitted by law, BBVA and its affiliates accept no liability of any type for any direct or indirect losses or damages arising from the use of this document or its contents. Investors should note that the past performance of securities or instruments or the historical results of investments do not guarantee future performance.

The market prices of securities or instruments or the results of investments could fluctuate against the interests of investors. Investors should be aware that they could even face a loss of their investment. Transactions in futures, derivatives, options on securities or high-yield securities can involve high risks and are not appropriate for every investor. Indeed, in the case of some investments, the potential losses may exceed the amount of initial investment and, in such circumstances; investors may be required to pay more money to support those losses. Thus, before undertaking any transaction with these instruments, investors should be aware of their operation, as well as the rights, liabilities and risks implied by the same and the underlying securities. Investors should also be aware that secondary markets for the said instruments may not exist. Before entering into transactions in futures, derivatives, or options, investors should review all documents on disclosures for risks of investing in options and/or futures at the following websites:

Options - <http://www.finra.org/Industry/Regulation/Notices/2013/P197741>

Futures - <http://www.finra.org/Investors/InvestmentChoices/P005912>

BBVA or any of its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to its clients that reflect opinions that are contrary to the opinions expressed herein. Furthermore, BBVA or any of its affiliates' proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein.
