7/29 SPX CL 4130.29

July Review – “The S&P rallied strongly into the end of May and went into a topping formation during the first week of June. From that high, the S&P had more than a 10% decline into a 6/17 low of the month. From that low, the S&P had about an 8% rally into a 6/28 high. From that high, the S&P dropped about two hundred handles into a 6/30 low. This followed by a traditional 4th of July pre-holiday rally into the three day weekend. So far, the 7/1 rally was a one day up day. We have a change in trend due over the 7/1 weekend. However, with only a one day rally, the market is not very over-bought. There can still be a high on 7/5 when we resume trading, but this is not a high confidence window. However, 7/5 AC has Mercury 0 North Latitude and this is one of our top Astro events. Given that factor, the rally may extend into 7/6 and that would be a higher confidence scenario.

Looking ahead – We have some huge Astro points coming in July and following are the top ones:
 7/5 – Mercury 0 North Latitude; 7/8 AC – Uranus Contra-Parallel US MC, Mercury Perihelion, Pluto 0 US Pluto (A 248 year cycle, now retrograding back to when it first hit on this cycle, on 2/21, just 3 days ahead of Russia invading Ukraine); 7/11 AM – Moon’s North Node Parallel US Mercury; 7/11 PM – Uranus 90 US Moon;
 7/13 PM – Full Moon in Capricorn at Perigee; 7/15 AC – Saturn Contra-Parallel Latitude US Neptune;
 7/26 PM – Moon’s North Node 0 Uranus (15.33 year cycle); 7/28 PM – New Moon in Leo;
 7/28 AC – Jupiter in Aries turns Retrograde; and Pluto Contra-Parallel US Sun. Please notice that most of these Astro events are major negative aspects to the US chart. I see the potential for the US being attacked via a military confrontation or a terrorist attack.

Please take a look at the S&P Fractal Forecast near the end of this letter. It’s beginning to show some good correlations. If this continues, there is the potential for a huge move in about 6 – 8 weeks.”

August Update – Following the 7/13 PM Full Moon at Perigee, the S&P etched the low of the month the next morning, and then mounted a strong rally for the second half of the month. Short term, the S&P is now bumping up against the top of its trading channel. There is a good chance for a top by 8/2 via the 8/1 AC Venus North Latitude. Bigger picture, on 7/29, the S&P broke out over its .382 Fibonacci retracement of the entire bear market, which was at 4088. This suggests that sometime in near future, the S&P may rally to the 50% level at 4228. The Fractal models are indicating a big move starting in the first half of August, which could last into the end of September.

The top Astro events for August are: 8/1 AC – Pluto Contra-Parallel US Sun and Venus 0 North Latitude; 8/03 AC – Moon's North Node 90 US Moon; 8/10 AC – Pluto Parallel US Part of Fortune; 8/11 AC – Full Moon in Aquarius and Mercury 0 South Latitude; 8/12 Moon's North Node Parallel Uranus; 8/23 PM – Helio Saturn Parallel Latitude Neptune and Jupiter 120 US North Node; 8/23 AC – Mercury Aphelion and Uranus Retrograde; and 8/26 AC New Moon in Virgo, Saturn 120 US Mars, Mercury Max. T-BONDS

7/01 ZB U22 CL 139-16

7/29 ZB U22 CL 143-20

July Review – “T-Bonds had a huge 10 handle decline into mid June and then a huge 10 handle recovery into the end of the month. If you are not familiar with T-Bond futures, a handle equals one full point which equals \$1,000. That was a \$10,000 decline and a \$10,000 rally for one contract.

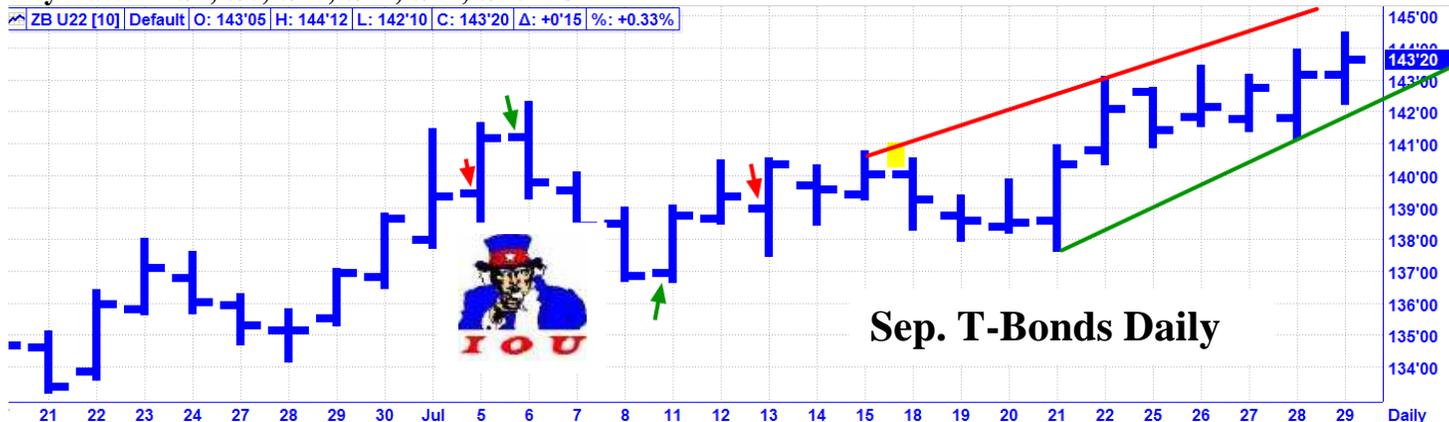

Looking ahead, there are several huge planetary points to the US chart and that is a major factor for T-Bonds. The top Astro events are: 7/1 AC– Jupiter 120 US North Node; 7/8 AC – Uranus Contra-Parallel US MC and Pluto 0 US Pluto (A 248 year cycle); 7/11 AM – Moon’s North Node Parallel US Mercury; 7/11 PM – Uranus 90 US Moon; 7/13 PM – Full Moon in Capricorn at Perigee; 7/15 AC – Saturn Contra-Parallel Latitude US Neptune; 7/28 PM – New Moon in Leo; and 8/1 PM Pluto Contra-Parallel US Sun. Key Dates – 7/5, 7/6, 7/11, 7/13, 7/18”

Results – 7/5 was one day ahead of a good high, but had you sold on the opening, it could have gone 3 handles against you. So, due to the volatility, I am counting that as not effective. 7/6 was a very good high. 7/11 was a good low. 7/13 was not effective. 7/18 was a pass. Score – 2 out of 4 good dates = 50%.

August Update – T-Bonds had a good recovery rally for most of July, following the deeply depressed June levels. The T-Bond Fractal model is indicating an important pivot point in mid August. The top Astro events for T-Bonds this month are: 8/1 AC – Pluto Contra-Parallel US Sun; 8/3 AC Moon’s North Node 90 US Moon; 8/10 AC – Pluto Parallel US Part of Fortune; 8/11 – Full Moon; 8/23 PM – Jupiter 120 US North Node; and 8/26 AC – New Moon, Saturn 120 US Mars, & Moon’s North Node Contra-Parallel US MC.

Results – 7/5 was a pass. 7/6, 7/18, and 7/28 were not effective. 7/7 was very close in price and one day past a short term high. 7/11 was very close in price and one day past a very good low. 7/13 was very close in price and one day past a short term high. Score – 3 out of 6 good dates = 50%.

7/01 HG Z22 CL 3.6220

7/29 HG Z22 CL 3.6000

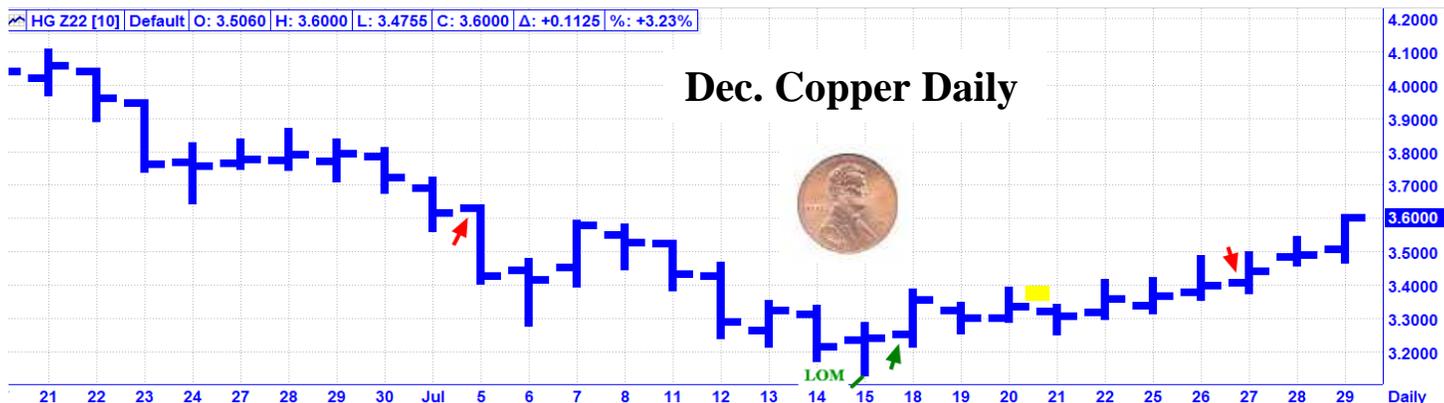

July Review – “Copper had a good rally into early June and then had a huge decline for the rest of the month. From an economic point of view, this is important because historically, Copper has long been viewed as a leading indicator. If the Copper’s price action in June is any indication, the economy is in serious trouble.

Looking ahead – The top Astro event for Copper in July is 7/26 AC – Moon’s North Node 0 Uranus in Taurus. Uranus is the co-ruling planet for Copper. This is a 15.33 year cycle. Key Dates – 7/5, 7/18, 7/21, 7/27”

Results – 7/5 and 7/27 were not effective. 7/21 was a pass. 7/18 was close in price and one day past the low of the month. Score – 1 out of 3 good dates = 33.34%.

COFFEE

7/01 KC U22 CL 223.90

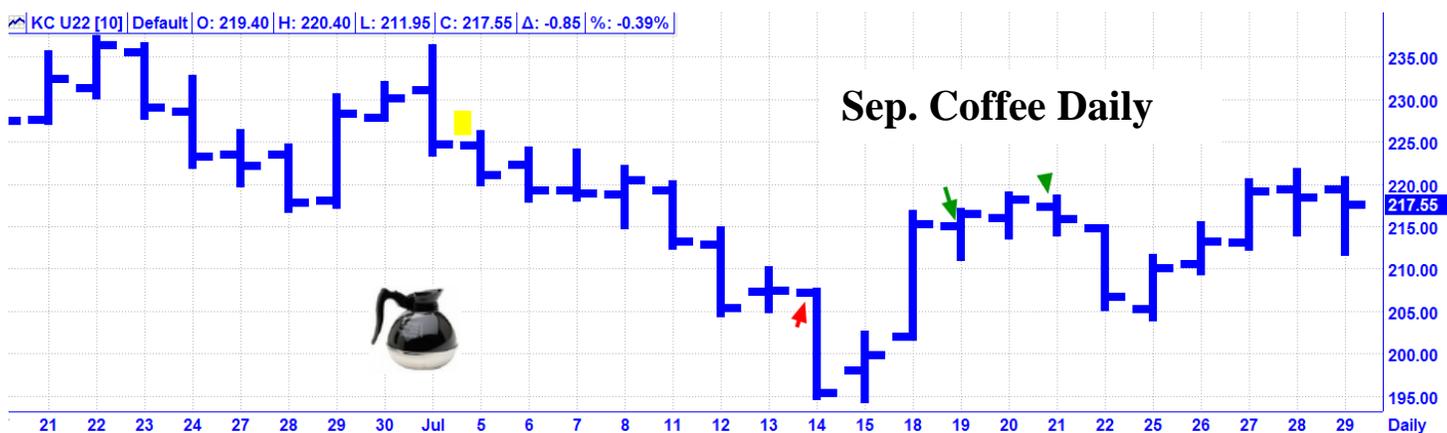

7/29 KC U22 CL 217.55

July Review – “During the past month, Coffee traded in a wide trading range. The top Astro events for Coffee are: 7/13 AC – Full Moon in Capricorn at Perigee; 7/18 AC – Helio Jupiter 60 Pluto; & 7/20 AC – Geo Jupiter 45 Saturn. Key Dates – 7/5, 7/14, 7/19, 7/21”

Results – 7/5 was one day past the high day of the month. However, the 7/5 opening was near the low of the 7/1 high. If your strategy was to sell against that high, you were assuming more than a 10 handle exposure, which in Coffee represents \$3750. That’s too much risk. So, I am calling that a pass. 7/14 was near the low of the month, with the low coming just a few ticks lower on 7/15. However, if you bought, per our rules, on the 7/14 open, you may have experienced a 10+ handle drawdown. So, I am calling that not effective. Now the good news is we had 7/19 and 7/21 which straddled a 7/20 good short term high. Both of those were relatively low risk. Score – 2 out of 3 good dates = 66.67%.

August Update - Coffee had a sharp decline into a 7/15 low of the month. This was followed in the third week of the month with a rally which recovered about half of the decline. Then, the market traded sideways into the end of the month. The top Astro events for Coffee this month are: 8/16 AC – Helio Jupiter enters Aries and 8/23 PM – Helio Saturn Parallel Latitude Neptune.

Key Dates – 8/11, 8/15, 8/17, 8/23, 8/26 AC

GRAINS

The historical short term key to the grains, especially Corn and Soybeans, has been a combination of the lunar cycle and the movements of Mercury. These markets tend to make short term reversals on New Moons and Full Moons. Historically, Full Moons have been lows and New Moons have usually been highs. However, recently this pattern has been inverted. Mercury turns retrograde approximately every 120 days, for a period of about 21 days. Grains tend to make highs at Mercury Retrograde and lows when it turns Direct. For example, Mercury turned Retrograde in Gemini 5/09 AC and turned Direct in Taurus 6/2 AC.

An ideal lunar cycle setup is when a market has a sizeable move into a Full Moon or a New Moon.

August Key Dates:

8/03 AC – Venus 0 North Latitude - Wheat.

8/11 AC – Full Moon/Aquarius - Corn, Oats, Soybeans, Wheat.

8/11 AC – Mercury 0 South Latitude - Corn, Oats, Soybeans, Wheat.

CORN

7/01 ZC Z22 CL 6070

7/29 ZC Z22 CL 6222

July Review – “From early June, Corn had a modest rally into a 6/17 high of the month. From that high, Corn had a sharp decline into the end of the month. Key Dates – 7/5, 7/6, 7/11, 7/14, 7/28, 7/29, 7/29 AC”

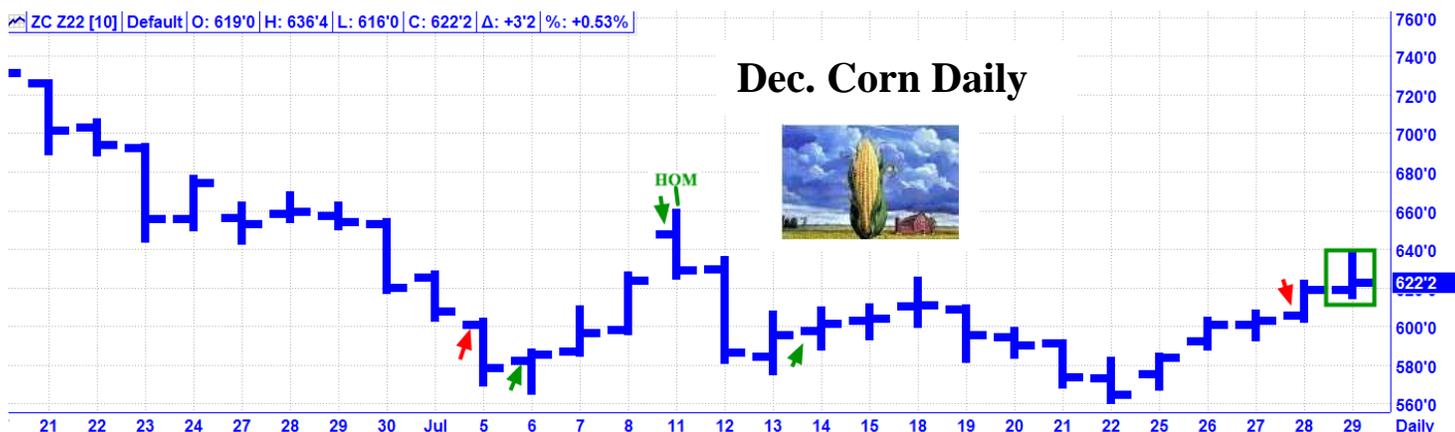

Results – 7/5 was one day ahead of a good low. However the entry on the opening was too far from the eventual low, so this was not effective. 7/6 was a very good low. 7/11 was the exact high of the month and a very good sell. 7/14 was close in price and one day past a low. 7/28 was not effective. Score – 3 out of 5 good dates = 60%.

August Update – Corn, following a large decline in June, traded mostly in July in a wide trading range. It was not highlighted in the July forecast, but it is interesting to note that Corn made it’s low of the month on 7/22, which was the day after when the Sun entered Leo. Leo is the ruling sign for Corn and the Sun is the co-ruling body.

The top Astro events for Corn this month are: 8/11 AC – Full Moon/Aquarius & Mercury 0 South Latitude; 8/16 AC – Helio Jupiter enters Aries; 8/23 AC – Mercury Aphelion; and 8/26 AC New Moon/Virgo & 8/26 AC – Mercury Max. Elongation East.

7/29 ZS X22 14734

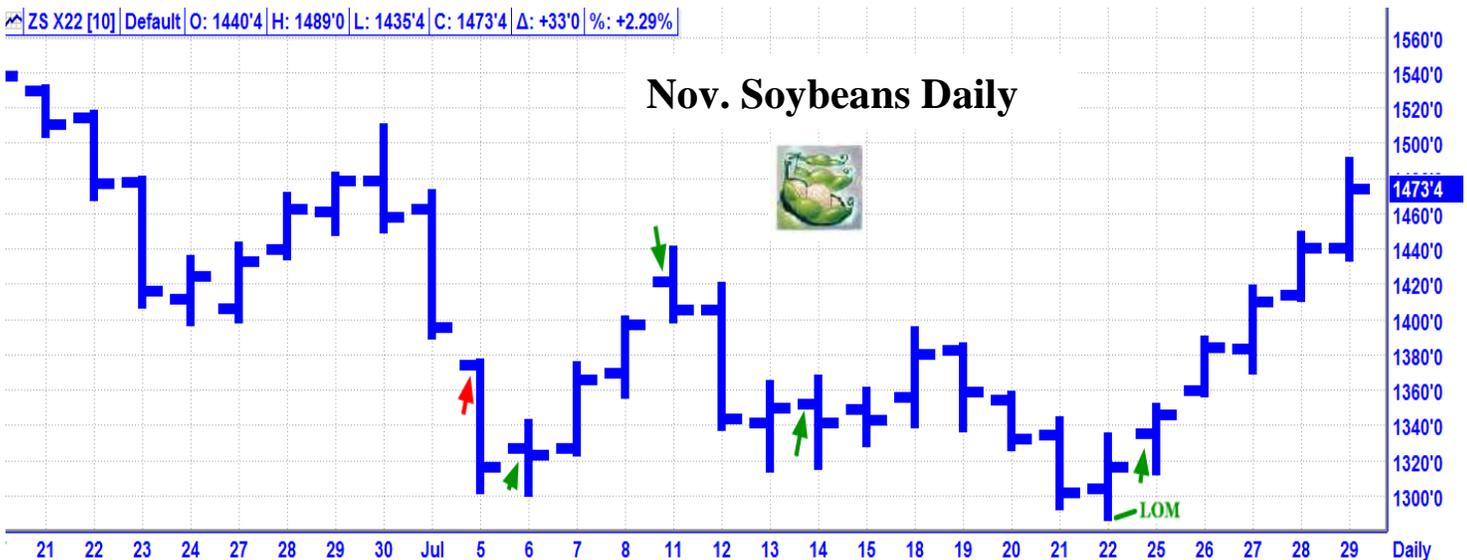

July Review – “Soybeans made the high of the month on 6/9 and then shifted to a strong down trend into a 6/24 low. From that low, they rallied into a 6/30 high. From that high, there was a strong decline into the 7/1 close. The top Astro events for Soybeans this month are: 7/5 AC – Mercury 0 North Latitude; 7/8 AC – Mercury Perihelion; 7/13 AC – Full Moon at Perigee; and 7/28 PM – New Moon in Leo.
