SUGAR

Key Dates - 7/5, 7/11, 7/18

Results - 7/5 was a very good low. 7/11 was very close in price and one day past a short term high. 7/18 was the exact high of the month. Score - 3 out of 3 good dates = 100%.

COFFEE

Key Dates – 7/5, 7/14, 7/19, 7/21

Results – 7/5 was one day past the high day of the month. However, the 7/5 opening was near the low of the 7/1 high. If your strategy was to sell against that high, you were assuming more than a 10 handle exposure, which in Coffee represents \$3750. That's too much risk. So, I am calling that a pass. 7/14 was near the low of the month, with the low coming just a few ticks lower on 7/15. However, if you bought, per our rules, on the 7/14 open, you may have experienced a 10+ handle drawdown. So, I am calling that not effective. Now the good news is we had 7/19 and 7/21 which straddled a 7/20 good short term high. Both of those were relatively low risk.

Score – 2 out of 3 good dates = 66.67%.

KC U22 [10] | Default | O: 219.40 | H: 220.40 | L: 211.95 | C: 217.55 | Δ: -0.85 | %: -0.39%

CORN

Key Dates – 7/5, 7/6, 7/11, 7/14, 7/28, 7/29 AC

Results – 7/5 was one day ahead of a good low. However the entry on the opening was too far from the eventual low, so this was not effective. 7/6 was a very good low. 7/11 was the exact high of the month and a very good sell. 7/14 was close in price and one day past a low. 7/28 was not effective. Score – 3 out of 5 good dates = 60%.
