3/25 SPX CL 4543.06

4/29 SPX CL 4131.93

April Review – “Following a pullback and consolidation into mid March, the S&P had a strong rally in the third week and then leveled out in the fourth week. However, the S&P maintained an upward bias into the 3/25 close, finishing just a few handles short of the Fibonacci .618 retracement of the entire 2022 decline. The math for this is that the high was 4819 – the low of 4114 = 705. .618 of 705 is 436 and added to the low gives you 4550. Therefore, the S&P is now at a critical price level. If the S&P can significantly break out over this level is it likely go to .786 retracement level at 4668. If it fails at the 4550 level, there is the potential for a significant decline.

This month is a very high energy month with a ton of huge planetary events. You may have noticed the long list on the first two pages, which may have been a new record. The best way to manage this type of month is one step and one day at a time. For the details, please see the lists on first two pages.”

## Stocks Continued –

May Update – The end of April had a huge cluster, with Pluto turning Retrograde and a Solar Eclipse over the 4/29 weekend. This coincided with a huge day down 4/29, which was the 15<sup>th</sup> biggest point drop for the DJIA on record. 4/29, the S&P 500 low of the day was only about 10 handles above the low of the year, which was at the 4115 level, and that is the current support level. There is no doubt that currently the Stock Market is in a down trend. Astrologically, the coming month looks like another big month. The top Astro events for May are: 5/9 AC - Mercury turns retrograde; 5/10 AC – Geo Jupiter enters Aries; 5/12 AC – Saturn Parallel Latitude US Moon; 5/13 AC – Moon’s North Node Parallel US North Node; 5/13 AC – Venus Aphelion; 5/13 AC – Full Moon – Lunar Eclipse; 5/16 AC Mercury 0 South Latitude; 5/27 AC Mercury Aphelion; 5/27 AC – Jupiter Parallel Latitude Neptune; 5/27 AC - Helio Saturn Contra-Parallel Uranus; and 5/27 – New Moon in Gemini. T-BONDS

3/25 ZB M22 CL 147-11

4/29 ZB M22 CL 139-29

April Review – “Following an early March rally peak, T-Bonds went into a strong and steady decline. It’s amazing it has taken so long for the Bond market to wake up. Even with March’s decline to a new yearly low, 30 year T-Bonds are only yielding about 2.5% against a backdrop of at least 8% annual inflation. You don’t have to be a PhD. in Economics to figure that one. Either the Bond market knows something we don’t know, or prices are headed much lower. Ok that was a rare opinion rant. LOL The situation is so obvious I couldn’t help myself, which means that if I am a good reverse barometer, when it comes to opinion, like most people, T-Bonds should be nearing a low. LOL

Astrologically, the two major factors for T-Bonds are the US natal chart and Pluto. This month, we have a ton of huge events. Here are some of the top ones: 4/1 AC – Jupiter Contra-Parallel US Neptune; 4/5 PM – Jupiter 180 US Neptune; 4/5 AC – Neptune Parallel US Saturn; 4/6 AC – Uranus 90 MC; 4/8 AC – Jupiter Parallel US Saturn; 4/14 PM – Jupiter 120 US Mercury; 4/22 AC – Jupiter Parallel US Moon; 4/27 AC – Neptune 120 US Mercury; and 4/29 AM – Pluto turns Retrograde.  
 Key Dates – 4/4, 4/6, 4/11, 4/14, 4/18, 4/25, 4/29, 4/29 AC”

Results – 4/4 and 4/25 were passes. 4/6, 4/11, and 4/18 were not effective. 4/14 was a very good short term high. 4/29 was a good short term high. Score – 2 out of 5 good dates = 40%.

May Update – T-Bonds had a sharp decline for most of the past month. The top Astro events for T-Bonds in the coming month are: 5/12 AC – Saturn Parallel Latitude US Moon; 5/13 AC – Moon’s North Node Parallel US North Node; 5/13 AC – Moon’s North Node 120 US Neptune; 5/13 AC – Full Moon – Lunar Eclipse; 5/23 AM – Jupiter 90 US Venus; and 5/27 – New Moon in Gemini.

### GRAINS

The historical short term key to the grains, especially Corn and Soybeans, has been a combination of the lunar cycle and the movements of Mercury. These markets tend to make short term reversals on New Moons and Full Moons. Historically, Full Moons have been lows and New Moons have usually been highs. However, recently this pattern has been inverted. Mercury turns retrograde approximately every 120 days, for a period of about 21 days. Grains tend to make highs at Mercury Retrograde and lows when it turns Direct. For example, Mercury turned Retrograde in Aquarius, 1/13 AC, & turned Direct, in Capricorn, 2/03 AC. Mercury will turn Retrograde 5/09 AC.

An ideal lunar cycle setup is when a market has a sizeable move into a Full Moon or a New Moon.
