

# **DAILY TECHNICAL REPORT**

**17 November 2017**

EUR / USD

**Bullish bounce.**

- EUR/USD is bouncing higher. Hourly resistance is located at 1.1878 (12/10/2017 high). The hourly support is given at a distance at 1.1554 (07/11/2017 low). Expected to show continued short-term consolidation before heading higher towards resistance at 1.1878 (12/10/2017 high).
- In the longer term, the momentum is now turning largely positive. We favour a continued bullish bias. Key resistance is holding at 1.2252 (25/12/2014 high) while strong support lies at 1.0341 (03/01/2017 low).

GBP / USD

**Strong recovery bounce.**

- GBP/USD has broken 1.3224 resistance indicate an extension of bullish momentum. Support is given at 1.3027 (06/10/2017 low).
- The long-term technical pattern is reversing. The Brexit vote had paved the way for further decline. Long-term support can be found at 1.1841 (07/10/2017 low). Long-term resistance given around 1.35 is at stake and indicates a long-term reversal in the negative trend. Yet, it is very unlikely at the moment.

USD / JPY

Selling pressure builds.

- USD/JPY has broken short-term uptrend channel. Hourly support given at 113.09 (09/10/2017 low) has been broken. Stronger support is located at a distance at 111.12 (20/09/2017 low). Expected to show further decline.
- We favor a long-term bearish bias. Support is now given at 99.02 (10/08/2013 low). A gradual rise towards the major resistance at 125.86 (05/06/2015 high) seems unlikely. Expected to decline further support at 93.79 (13/06/2013 low).

USD / CHF

**Bullish bounce halted.**

- USD/CHF declining trendline has halted progress. The technical structure indicates further downside risks. The pair has failed to hold consistently above the parity. If the pair heads towards 0.98, there might be even more downside pressures. The road would be wide-open for further decline.
- In the long-term, the pair is still trading in range since 2011 despite some turmoil when the SNB unpegged the CHF. Key support can be found 0.8986 (30/01/2015 low). The technical structure favours nonetheless a long term bullish bias since the unpeg in January 2015.

AUD / USD

Break of key support.

- AUD/USD is ready to go even lower showing that downside pressures are still lively. Hourly resistance is given at a distance at 0.7897 (13/10/2017 high). Expected to show renewed pressures towards key support at 0.7535 (22/06/2017 low).

Sharp drop.

- Crude oil has weakened after hitting a 1-year high. Expected to show further short-term bearish consolidation. Indeed the technical structure has a history of decent consolidation phase.
- In the long-term, crude oil has recovered after its sharp decline last year. However, we consider that further weakness are very likely. For the time being the pair lies in an upside momentum. Strong support lies at 35.24 (05/04/2016) while resistance can now be found at 55.24 (03/01/2017 high).

BITCOIN (in USD)

**Volatile.**

- Bitcoin has pulled back after impressive recovery bounce. The technical structure shows a tremendous positive short-term momentum. Hourly support is located at 5605 (13/11/2017 low). Strong support stands very far at 2975 (22/08/2017 low). In the short-term, the digital currency should continue rising.
- In the long-term, the digital currency has had an exponential growth. There are decent likelihood that the asset will reach \$10'000.
