What we'll be watching (p. 3)

Calendar of upcoming releases (p. 5)

A division of National Bank of Canada

Annex – Economic tables (A1)

#### Week in review

Canada - In September, the Teranet-National Bank National Composite House Price Index™ rose 0.8% over the previous month. This was the second largest September increase since the index's inception in 1999. Prices were up in six of the eleven regions covered: Toronto (+2.2%), Hamilton (+1.4%), Victoria (+1.1%), Calgary (+0.3%), Vancouver (+0.2%) and Winnipeg (+0.1%). They were stable in Halifax and declined in Edmonton (-0.4%), Ottawa-Gatineau (-0.6%), Montreal and Quebec City (-0.8% respectively). Year over year, the national index sprang 11.7%, its steepest 12-month jump since June 2010. Leading the charge were Vancouver (+24.0%), Victoria (+17.9%), Toronto (+16.4%) and Hamilton (+13.1%), followed at a good distance by Winnipeg (+4.6%), Ottawa-Gatineau (+0.9%) and Montreal (+0.2%). Prices were down from a year earlier in Edmonton (-0.7%), Halifax (-0.9%), Quebec City (-2.0%) and Calgary (-4.9%). In Vancouver, after seven hefty monthly increases in a row, prices were virtually flat m/m. This was consistent with a recent loosening of the resale market. Indeed, since hitting an all-time high last February, sales have dropped month after month for a cumulative decline of 44%.

#### Home resale market conditions Active listings and sales, seasonally adjusted by NBF; last observation: September

NBF Economics and Strategy (data from Real Estate Board of Greater Vancouver)

Toronto is now the red hot market with sales breaking records in each of the past three months. High demand and low supply have combined there to lift monthly price growth to 2.9% on average over the past four months.

Again in September, housing starts rose at an annual rate of 19.7% to 220.6K. In urban areas, multiple starts were up 25.1K (+22.3%) to 137.8K, and single-detached starts increased 8.1K (+14.4%) to 64.0K. In rural areas, starts were estimated at 18.8K units, up 3.1K (+20.4%). On a regional basis, starts increased sharply in British Columbia (+13.4K), Quebec (+13.1K), Alberta (+9.3K), Nova Scotia (+3.0K) and New Brunswick (+2.0K). They progressed at a much slower pace in Manitoba (+0.3K) and fell in the other provinces: Ontario (-2.8K), Saskatchewan (-1.7K), Prince Edward Island (-0.1K) and Newfoundland and Labrador (-0.1K). Following September's surge, starts in Q3 were up an annualized 4.2% over Q2. They thus contributed to economic growth in the quarter, especially as they were tilted towards single-family homes, which were up 7.3%.

United States - Retail sales were up a consensusmatching 0.6% in September. The prior month was revised up one tick to -0.2% (from -0.3%). September sales got a lift from motor vehicles/parts (+1.1%), but there were also contributions from several other categories. Indeed, excluding autos, sales were up a healthy 0.5%, also matching consensus expectations, buoyed by increases in gasoline station receipts and higher sales of building materials, furniture, and sporting goods. Nonstore retailers also posted gains. All of those gains more than offset declines for sellers of electronics, health/personal care items, and general merchandise. Retail sales excluding auto, gasoline and building materials increased by only 0.1% m/m in September, following a 0.2% m/m decline in July and a 0.1% m/m fall in August. All in all, assuming consensus is right about CPI growing 0.3% in September (due next week), then retail sales grew a healthy 0.3% in real terms in the month. Thanks to September's gains, real retail spending grew roughly 3.3% annualized in Q3 (compared to the prior quarter's gains of 4.7%). The results do not change our view U.S. GDP growth accelerated to over 3% annualized in the third guarter.

The NFIB Small Business Optimism Index slipped three ticks to 94.1 for a second straight drop. Four of the 10 components rose, while the other six declined. Though the outlook for business conditions registered the strongest advance, its 12point gain merely brought the component back to a net 0% expecting improvement. Moreover, though earnings trends improved three points, it still meant that a net -20% reported a q/q improvement in profits. Two components recorded sharp losses: job openings (-6 points) and plans for inventory investment (-8 points).

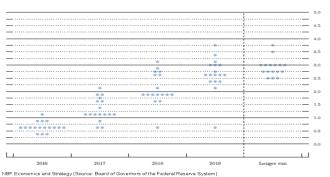

In August, **job openings** fell 388K to 5.44 million, their steepest monthly decline since August 2015. The number of total separations, which includes layoffs and discharges (1.6 million), quits (3 million) and other separations (350K), was little changed at 5 million. The quits rate held firm at 2.1%.

Separately, the **producer price index** rose 0.3% in September, boosted in part by gains for food and energy. Excluding those items, the PPI rose 0.2% thanks in part to services. On a year-on-year basis, the PPI printed 0.7% on the headline measure and 1.2% on the core, both still very mild. Upstream price pressures remain very soft according to the PPI. So, while next week's CPI will likely show an increase, consumer price inflation is set to remain under wraps over the coming months.

In September, **import prices** edged up 0.1% m/m, reversing part of the previous month's decline (-0.2%). A 1.2% hike in imported petroleum prices accounted for much of the overall increase. Ex-petroleum import prices were flat. Relative to September 2015, import prices were down 1.1%. **Export prices** rose 0.3% m/m.

The Minutes of the FOMC's September meeting showed that participants had divergent views on the degree of slack still left in the economy. Not surprisingly they also disagreed on when it would be appropriate to raise the fed funds target range. In this context, participants discussed the costs and benefits associated with undershooting the normal rate of unemployment. Among the participants who supported waiting further before hiking the policy rate, several stated that the decision was a close call. Some participants were of the opinion that it would be appropriate to raise the target range for the fed funds rate relatively soon, while three members voted to raise it by 25 bps at the September meeting. Several expressed concern that, in light of recent economic data, continuing to delay an increase in the target rate risked eroding the FOMC's credibility. Members generally agreed that the case for an increase in the policy rate had strengthened leading up to the September meeting and most participants expected one rate increase this year (see dot plot).

Consequently, we share Fed Chair Janet Yellen's point of view expressed in her post-FOMC meeting press conference to the

effect that such a move should be expected if the economy stayed the current course of labour market improvement and no major new risks developed. In our view, a quarter-point increase in the fed funds target range is highly likely in December.

World — In September, the Caixin China Services PMI edged down one tick to 52.0 from a month earlier, pulling the composite index down four ticks to 51.4. The trade report was disappointing as well, as it showed exports fell 10% in USD terms from a year earlier. This was the sixth consecutive decline and followed a 2.8% y/y drop the previous month. Imports sank 1.9% y/y. Consequently, China's trade surplus shrank to US\$41.99 billion from US\$52.05 billion in August. Producerprices rose 0.1% y/y in September. The last time China's PPI was not in a deflationary mode was in January 2012. The Consumer Price Index rose 1.9% y/y in September.

In August, **Eurozone industrial production** grew 1.6% m/m. The sectors that contributed to growth included durable consumer goods (+4.3%), capital goods (+3.5%), energy (+3.3%) and intermediate goods (+1.4%). Non-durable consumer goods production detracted from growth as it pulled back 0.6% on the month. Relative to August 2015, industrial production grew 1.8%.

# What we'll be watching

In Canada, the highlight of the week will be the Bank of Canada's interest rate announcement and Monetary Policy Report on Wednesday. The central bank has been unambiguously dovish in its recent

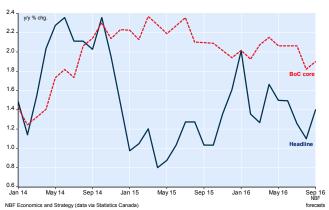

communications, leading markets to price some probability of interest rate cuts and the Canadian dollar to depreciate. But recent developments make it harder for the central bank to maintain its negative tone. We just saw the best quarterly performance for the labour market in three years and a sharp rebound in export volumes in Q3. Moreover, oil prices are up roughly 15% since the last MPR was released, and the BoC's own surveys suggest business intentions to hire and invest are the best since 2014. The central bank will likely keep the overnight rate unchanged at 0.50%, while acknowledging those improvements. But it's unlikely to ditch the dovish language entirely given its preference in keeping the loonie grounded.

More information will become available about the third quarter thanks to important data for the month of August. **Manufacturing shipments** may have increased for a third consecutive month based on healthy export volumes in the month. We're also expecting gains for **retail sales** which were reportedly buoyed by autos in August. However, sinking pump prices likely restrained gasoline station receipts, while sales of sporting goods and clothing probably softened after the prior month's outsized gains. All in all, retail sales may have grown about 0.3%. September data is likely to show the **consumer price index** rising in synch with higher energy prices. After being atypically weak the prior month, core inflation should bounce back. The year-on-year inflation rate probably rose to 1.4% on the headline measure and to 1.9% on the core measure.

	Previous	NBF forecasts
CPI (September y/y chg.)	1.1%	1.4%
Core CPI (September y/y chg.)	1.8%	1.9%
Retail sales (August m/m chg.)	-0.1%	0.3%
ex-autos Retail sales (August m/m chg.)	-0.1%	0.2%
Manufacturing shipments (August m/m chg.)	0.1%	0.1%
Bank of Canada rate	0.50%	0.50%

#### Canada: Uptick for inflation in September

Consumer price index

# What we'll be watching

In the U.S., we'll get additional clues about GDP growth in the third quarter thanks to crucial September data. Industrial production may have bounced back in the month in part due to the manufacturing

sector. Housing data for September could show an increase for both existing home sales and housing starts after outsized declines the prior month. The consumer price index rose in September due to higher energy prices. But core inflation likely remained stable. We'll also get first clues about October thanks to the NAHB builder confidence index and regional manufacturing reports such as the Empire and Philly. The Fed's Beige Book, due on Wednesday, will give updated information about the state of the U.S. economy.

	Previous	NBF forecasts
CPI (September y/y chg.)	1.1%	1.5%
Core CPI (September y/y chg.)	2.3%	2.3%
Industrial production (September m/m chg.)	-0.40%	0.20%

U.S.: Core inflation likely stable in September

Elsewhere around the globe, all eyes will be on the European Central Bank which is under pressure to stimulate a stagnant Eurozone economy. Eurostat will release the second estimate of September's consumer price index. In China, Q3 GDP results will be

released this week, but we'll also learn about the handoff to the next quarter thanks to September data on retail sales and industrial production.

General - National Bank Financial (NBF) is an indirect wholly owned subsidiary of National Bank of Canada. National Bank of Canada is a public company listed on Canadian stock exchanges.

The particulars contained herein were obtained from sources which we believe to be reliable but are not guaranteed by us and may be incomplete. The opinions expressed are based upon our analysis and interpretation of these particulars and are not to be construed as a solicitation or offer to buy or sell the securities mentioned herein.

Research Analysts – The Research Analyst(s) who prepare these reports certify that their respective report accurately reflects his or her personal opinion and that no part of his/her compensation was, is, or will be directly or indirectly related to the specific recommendations or views as to the securities or companies.

NBF compensates its Research Analysts from a variety of sources. The Research Department is a cost centre and is funded by the business activities of NBF including, Institutional Equity Sales and Trading, Retail Sales, the correspondent clearing business, and Corporate and Investment Banking. Since the revenues from these businesses vary, the funds for research compensation vary. No one business line has a greater influence than any other for Research Analyst compensation.

Canadian Residents – In respect of the distribution of this report in Canada, NBF accepts responsibility for its contents. To make further inquiry related to this report, Canadian residents should contact their NBF professional representative. To effect any transaction, Canadian residents should contact their NBF Investment advisor.

U.S. Residents – With respect to the distribution of this report in the United States, National Bank of Canada Financial Inc. (NBCFI) is regulated by the Financial Industry Regulatory Authority (FINRA) and a member of the Securities Investor Protection Corporation (SIPC). This report has been prepared in whole or in part by, research analysts employed by non-US affiliates of NBCFI that are not registered as broker/dealers in the US. These non-US research analysts are not registered as associated persons of NBCFI and are not licensed or qualified as research analysts with FINRA or any other US regulatory authority and, accordingly, may not be subject (among other things) to FINRA restrictions regarding communications by a research analyst with the subject company, public appearances by research analysts and trading securities held a research analyst account.

All of the views expressed in this research report accurately reflect the research analysts' personal views regarding any and all of the subject securities or issuers. No part of the analysts' compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report. The analyst responsible for the production of this report certifies that the views expressed herein reflect his or her accurate personal and technical judgment at the moment of publication. Because the views of analysts may differ, members of the National Bank Financial Group may have or may in the future issue reports that are inconsistent with this report, or that reach conclusions different from those in this report. To make further inquiry related to this report, United States residents should contact their NBCFI registered representative.

**UK Residents** – In respect of the distribution of this report to UK residents, National Bank Financial Inc. has approved the contents (including, where necessary, for the purposes of Section 21(1) of the Financial Services and Markets Act 2000). National Bank Financial Inc. and/or its parent and/or any companies within or affiliates of the National Bank of Canada group and/or any of their directors, officers and employees may have or may have had interests or long or short positions in, and may at any time make purchases and/or sales as principal or agent, or may act or may have acted as market maker in the relevant investments or related investments discussed in this report, or may act or have acted as investment and/or commercial banker with respect thereto. The value of investments can go down as well as up. Past performance will not necessarily be repeated in the future. The investments contained in this report are not available to retail customers. This report does not constitute or form part of any offer for sale or subscription of or solicitation of any offer to buy or subscribe for the securities described herein nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever.

This information is only for distribution to Eligible Counterparties and Professional Clients in the United Kingdom within the meaning of the rules of the Financial Conduct Authority. National Bank Financial Inc. is authorised and regulated by the Financial Conduct Authority and has its registered office at 71 Fenchurch Street, London, EC3M 4HD.

National Bank Financial Inc. is not authorised by the Prudential Regulation Authority and the Financial Conduct Authority to accept deposits in the United Kingdom.

Copyright – This report may not be reproduced in whole or in part, or further distributed or published or referred to in any manner whatsoever, nor may the information, opinions or conclusions contained in it be referred to without in each case the prior express written consent of National Bank Financial.
