Week in review

Canada - In October, the merchandise trade deficit narrowed to C\$1.1 billion (its lowest level since January) after widening to a revised record high of C\$4.4 billion the prior month. In nominal terms, exports rose 0.5% while imports sank 6.3% after registering an outsized increase the previous month. The energy trade surplus grew to C\$4.6 billion (its highest level since June 2015) as exporters benefited from both higher prices and higher volumes. The non-energy trade deficit improved to C\$5.7 billion, a three-month best. In real terms, exports fell 0.9% while imports tumbled 7.4%, more than reversing the prior month's surge. The weakness in two-way trade was disappointing. The slump in imports was attributable primarily to sharply lower imports of industrial machinery (these had surged the prior months thanks to a module destined for the Hebron offshore oil project in Newfoundland and Labrador), and sharp drops in energy products, and metal ores and non-metallic minerals. Exports were up, helped by higher prices, while overall volumes were down – gains for energy were more than offset by declines for non-energy products. The latter are now 9% below their peak of nine and a half years ago (chart). As a result, goods exports are on track to recording a drop of about 7% annualized in real terms in Q4 while imports are headed for an even steeper fall of 18%. In other words, trade may be contributing to GDP growth in the quarter, but not for the right reason.

Canada: Export volumes fell in October

In November, housing starts fell 4.3% to 184K, far short of the 191K expected by consensus. The decline was due to a 5% drop in urban starts, which dwarfed a 2.8% increase in rural starts. The decrease in the urban segment was entirely due to a 7.7% contraction in multi-unit starts, given that single-family starts were roughly flat. On a regional basis, lower urban starts in Ontario (-31.9%), Atlantic Canada (-10.1%) and Quebec (-4.2%) more than offset higher urban starts in British Columbia (+72.7%) and the Prairies (+1.6%). We expect starts in 2017 to fall to about 180K (from 196K in 2016) mainly on account of higher mortgage rates, lower affordability and recently adopted measures that make it harder, especially for first-time home buyers, to qualify for an insured mortgage loan. Meanwhile, starts in Q4 are set to pull back from their Q3 level, although the impact of this on GDP is unclear given the higher relative proportion of single-family starts.

Separately, **building permits** jumped 8.7% in dollar terms in October. The value of non-residential permits rose 10.7% on impetus from commercial applications, while the value of residential permits was up 7.7%. In real terms, residential permits rose 7.9% on an 11.8% increase in the single-family segment and a 5.9% increase in the multi-unit category. Though the advance in residential building permits suggests that starts could bounce back in the coming months (particularly in Ontario), we are not particularly upbeat about longer term prospects for residential construction. Mortgage rules implemented by the federal government this year will eventually take some steam out of demand, and supply should respond accordingly.

As was widely expected, the Bank of Canada left its overnight rate unchanged at 0.50% in December. On a dovish tone, the Bank noted that business investment and non-energy goods exports continued to disappoint and that a significant amount of economic slack remained in Canada, a state of affairs in sharp contrast with the situation in the United States where the economy was operating at near full capacity. This allusion was meant to remind people that the BoC did not need to move in lockstep with the Fed. Moreover, the BoC chose to exclude from its press release an assessment of the balance of risk related to the inflation outlook. It thus signaled that there was more uncertainty than usual surrounding the economic outlook at a time when it was unclear how things would evolve south of the border. Fiscal expansion could be coming to the United States at a time when the economy is already operating at near full capacity. This rendered the inflation outlook uncertain. In this context, the Bank was in fact leaving its options open after reporting in October that it had actively discussed the possibility of adding more monetary stimulus. In short, the Bank has

decided to remain in wait-and-see mode. However, it is doubtful that the situation in the United States will be much clearer by January 18 when the BoC is slated to present its economic update.

United States — The trade deficit widened to US\$42.6 billion in October from a revised US\$36.2 billion the prior month. The deterioration was attributable to a combination of lower exports (-1.8%) and higher imports (+1.3%). In real terms, exports fell 2.9% while imports rose 1.4%. The trade figures were roughly in line with consensus expectations. Trade was a strong contributor to real economic growth in Q3 as exports registered double-digit annualized growth for the first time since 2013. However, such a strong performance could be followed by a pullback in Q4, as merchandise exports were down an annualized 7% after one month of data. With trade being a drag on growth so far in the quarter, the data support our view that the U.S. economy is set to decelerate closer to 2.0% annualized in Q4.

Factory orders surged 2.7% in October. Durable goods orders jumped 4.6% thanks in large part to the transportation component (+12.0%). Excluding transportation, factory orders rose 0.8%. Consumer durables (+0.2%) and non-durables (+1.3%) were both up in the month. It is worth noting that orders ex-transportation rose in 7 of the last 8 months. This stands in stark contrast with the 8 monthly declines in the prior year. It remains to be seen how the manufacturing sector will deal with the renewed strength of the USD in 2017.

Still in October, **job openings** fell 97K from the previous month to 5.53 million. Layoffs remained essentially unchanged at 1.5 million while quits decreased 66K to 2.99 million. The quit rate held steady at 2.1% for a fifth consecutive month.

Consumer credit rose US\$16 billion in October to US\$3,727.3 billion. Revolving and non-revolving credit grew by US\$2.3 billion and US\$13.7 billion, respectively.

The **ISM Non-Manufacturing Index** climbed 2.4 points to 57.2 in November, its highest reading since October 2015 (58.3). Employment rose 5.1 points to 58.2. The price index slid to 56.3 from 56.6 the previous month. All industries with the exception of health care reported increased activity. The business activity index stood at 61.7, up almost 10 points from the year-low mark of 51.8 reached in August.

World — In November, the Caixin **China** Services PMI rose to 53.1 from 52.4 the previous month. The composite index was unchanged at 52.9. The trade surplus shrank to US\$44.6 billion from a revised US\$48.7 billion in October. Exports were stronger than expected, progressing 0.1% y/y instead of retreating a projected 5.0%. Imports, too, were stronger than anticipated, growing 6.7% y/y after declining 1.4% the month before. In November, the consumer price index grew 2.3% y/y, compared to 2.1% in the previous month. The producer price index jumped 3.3% y/y, exceeding expectations (2.3%).

In the **Eurozone**, the ECB left its main policy rates unchanged. It also announced that it was continuing "its purchases under the asset purchase programme (APP) at the current monthly pace of €80 billion until the end of March 2017. From April 2017, the net asset purchases are intended to continue at a monthly pace of €60 billion until the end of December 2017, or beyond, if necessary, and in any case until the Governing Council sees a sustained adjustment in the path of inflation consistent with its inflation aim."

To the extent that tapering means a gradual reduction of the asset purchase programme towards zero, ECB President Mario Draghi argued that the decision to reduce the rate of purchases to €60 billion starting in April 2017 was not a step in that direction. In order to ensure the smooth implementation of its programme, the ECB has decided that, if necessary, it would permit the purchase of bonds yielding less than minus 40 bps. The ECB also extended the maturity range of the bonds it could purchase to include those maturing in one year (previously, the lower limit was two years). The Eurosystem staff projections for GDP growth were left broadly unchanged at 1.7% for 2016 and 2017 and 1.6% for the following two years. Inflation was projected at 1.3% for 2017, 1.5% for 2018, and 1.7% for 2019.

What we'll be watching

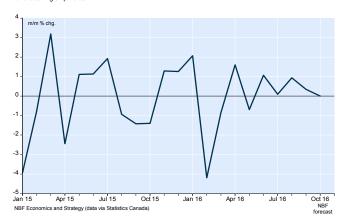

In Canada, a light data week will feature **manufacturing shipments** for October. Soft exports of factory goods during the month suggest shipments may have been no better than flat. November data on the housing

market will also be available thanks to **existing home sales** and resale home prices as measured by the **Teranet/National Bank house price index**. The **Bank of Canada** presents its Financial System Review on Thursday.

	Previous	NBF forecasts
Manufacturing sales (October m/m chg.)	0.3%	0.0%

Canada: Factory sales likely softened in October Manufacturing shipments

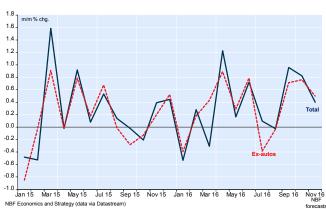

In the U.S., all eyes will be on the Federal Reserve as it presents updated economic projections and decides on monetary policy. The Fed will likely deliver the 25 basis points rate increase markets are expecting in light of

the sharp rebound in economic activity which has allowed the jobless rate to fall to the lowest since mid-2007. The tone of the statement and economic projections will be crucial in gauging the amount of tightening markets should expect next year. The Fed could raise its 2017 and 2018 growth forecasts to reflect the incoming President's plan to lower taxes and increase government spending, although it will refrain from sounding too upbeat for fear of triggering another leg of dollar appreciation. November data released this week will give further clues about how Q4 growth is shaping up. Retail sales probably increased further in light of continued resilience in the labour market. Higher pump prices gave a lift to gasoline station receipts offsetting soft auto sales during the month. All in all, sales may have risen about 0.4%. Housing starts are expected to fall sharply after October's outsized gains. Inflationary pressures will also be assessed with the release of the consumer price index. Rising gasoline prices pushed up the CPI, causing the annual inflation rate to rise to roughly 1.7%. The manufacturing sector seems to have taken a breather, enough to cause an overall decline for industrial production. We'll also get very first clues about December manufacturing activity with the release of Markit's flash purchasing managers index and regional indices such as the Empire and Philly.

	Previous	NBF forecasts
Fed funds rate	0.50%	0.75%
Retail sales (November m/m chg.)	0.8%	0.4%
ex-autos Retail sales (November m/m chg.)	0.8%	0.5%
CPI (November y/y chg.)	1.6%	1.7%
Core CPI (November y/y chg.)	2.1%	2.2%

U.S.: Consumption continued to expand in November Retail sales

What we'll be watching

Elsewhere around the world, November data in China on credit, industrial production and retail sales will give some clues about Q4 GDP in the world's second largest economy. Japan's Tankan survey for Q4 will be closely watched as usual.

In the Eurozone, October data on industrial production and trade will be released this week. Markit will release December flash purchasing managers indices this week for Japan and the Eurozone.

General - National Bank Financial (NBF) is an indirect wholly owned subsidiary of National Bank of Canada. National Bank of Canada is a public company listed on Canadian stock exchanges.

The particulars contained herein were obtained from sources which we believe to be reliable but are not guaranteed by us and may be incomplete. The opinions expressed are based upon our analysis and interpretation of these particulars and are not to be construed as a solicitation or offer to buy or sell the securities mentioned herein.

Research Analysts – The Research Analyst(s) who prepare these reports certify that their respective report accurately reflects his or her personal opinion and that no part of his/her compensation was, is, or will be directly or indirectly related to the specific recommendations or views as to the securities or companies.

NBF compensates its Research Analysts from a variety of sources. The Research Department is a cost centre and is funded by the business activities of NBF including, Institutional Equity Sales and Trading, Retail Sales, the correspondent clearing business, and Corporate and Investment Banking. Since the revenues from these businesses vary, the funds for research compensation vary. No one business line has a greater influence than any other for Research Analyst compensation.

Canadian Residents – In respect of the distribution of this report in Canada, NBF accepts responsibility for its contents. To make further inquiry related to this report, Canadian residents should contact their NBF professional representative. To effect any transaction, Canadian residents should contact their NBF Investment advisor.

U.S. Residents – With respect to the distribution of this report in the United States, National Bank of Canada Financial Inc. (NBCFI) is regulated by the Financial Industry Regulatory Authority (FINRA) and a member of the Securities Investor Protection Corporation (SIPC). This report has been prepared in whole or in part by, research analysts employed by non-US affiliates of NBCFI that are not registered as broker/dealers in the US. These non-US research analysts are not registered as associated persons of NBCFI and are not licensed or qualified as research analysts with FINRA or any other US regulatory authority and, accordingly, may not be subject (among other things) to FINRA restrictions regarding communications by a research analyst with the subject company, public appearances by research analysts and trading securities held a research analyst account.

All of the views expressed in this research report accurately reflect the research analysts' personal views regarding any and all of the subject securities or issuers. No part of the analysts' compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report. The analyst responsible for the production of this report certifies that the views expressed herein reflect his or her accurate personal and technical judgment at the moment of publication. Because the views of analysts may differ, members of the National Bank Financial Group may have or may in the future issue reports that are inconsistent with this report, or that reach conclusions different from those in this report. To make further inquiry related to this report, United States residents should contact their NBCFI registered representative.

UK Residents – In respect of the distribution of this report to UK residents, National Bank Financial Inc. has approved the contents (including, where necessary, for the purposes of Section 21(1) of the Financial Services and Markets Act 2000). National Bank Financial Inc. and/or its parent and/or any companies within or affiliates of the National Bank of Canada group and/or any of their directors, officers and employees may have or may have had interests or long or short positions in, and may at any time make purchases and/or sales as principal or agent, or may act or may have acted as market maker in the relevant investments or related investments discussed in this report, or may act or have acted as investment and/or commercial banker with respect thereto. The value of investments can go down as well as up. Past performance will not necessarily be repeated in the future. The investments contained in this report are not available to retail customers. This report does not constitute or form part of any offer for sale or subscription of or solicitation of any offer to buy or subscribe for the securities described herein nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever.

This information is only for distribution to Eligible Counterparties and Professional Clients in the United Kingdom within the meaning of the rules of the Financial Conduct Authority. National Bank Financial Inc. is authorised and regulated by the Financial Conduct Authority and has its registered office at 71 Fenchurch Street, London, EC3M 4HD.

National Bank Financial Inc. is not authorised by the Prudential Regulation Authority and the Financial Conduct Authority to accept deposits in the United Kingdom.

Copyright – This report may not be reproduced in whole or in part, or further distributed or published or referred to in any manner whatsoever, nor may the information, opinions or conclusions contained in it be referred to without in each case the prior express written consent of National Bank Financial.
